STOP

START

Technology is advancing and so are we!! Well this is the path you are waiting for...Charge up ur brains coz u need to apply really good coding skills to make ur bot reach d destination faster...We have introduced a new style this time...'The Beeline'We will be asking you before starting d race to choose which path ur bot will like to follow after a junction..the path you are not willing to follow will be covered with white paper(dont worry)....So code ur bot accordingly because " shortcuts are hard to take but are faster at d same time"

Taking shortcut will give you bonus(its fair!!)

Bon Voyage!!
